IReXP — what this work adds

- + **Large**
121,233 experimental IR band lists
- + **Redistributable**
88,545 CC-BY / CC0; bulk download
- + **Traceable**
source DOI + per-record licence pool
- + **Experimental**
peak positions only — not simulated spectra

IR peers only. SDBS ≈54k FT-IR absorbance (AIST 2015; view-only). NIST ≈17k gas-phase IR (approx.; view-only). Zipoli et al. 177,461 *computed* IR spectra (Sci. Data 2025). NMRexp (3.37M NMR lists) is the literature-mining method peer — not plotted. Band lists ≠ absorbance traces.
