IRexp — what this work adds

- + **Large** 121,233 experimental IR band lists from open literature
- + **Redistributable** 88,545 CC-BY/CC0; bulk download
- + **Traceable** source DOI + per-record licence pool
- + **Experimental** not simulated spectra; peak positions only

IR peers only. SDBS ≈54k digitised FT-IR absorbance (AIST 2015; view-only). NIST WebBook ≈17k gas-phase IR (approx.; view-only). Zipoli et al. 177,461 *computed* IR spectra (Sci. Data 2025; open, different object). **IReXP** = experimental cm⁻¹ band lists with redistribution pools. NMRexp (3.37M NMR peak lists) is the literature-mining *method* peer — not plotted
